1	Стогов Михаил 10 класс школа 1572 руководитель проекта – Никитина Елена Дмитриевна	MECHANIZED CASH IN SUPERMARKETS <p>My research aims at simplifying shopping. Oddly enough, most of the time people spend in the store waiting in the checkout. It depends primarily from the cashiers. Due to the small state, only 30% of offices are open for service. This occurs due to the inability to contain a large number of sellers and their permanent shifts or dinner brakes. All this leads to long queues and wasting precious in our world of time. I found a solution to this problem. In our time is complete mechanization of the work. It is time to mechanize that industry too. I did some research, allowing to understand the savings and profit from realization of my ideas.</p>

MOBILE RESEARCH STATION FOR SOIL SAMPLING AND EXPLORING SURFACE OF PLANETS. <p>Nowadays science technologies are developing at an incredible speed. Robots and electric devices have become a part of our everyday life. We suppose, they have their advantages, they help us. Therefore we have had an idea to make something that will be much cheaper and more compact. The idea of the project came to us, when we explored a rover «Curiosity». «Why so expensive?» - we wondered and decided to create our own research station. We have determined with materials and began collecting details. The details were simple small radio controlled cars, which were given us by the students of junior classes.</p>
